

MERN STACK

DAY – 5

30 June 2026

CSS

DIV

- The <div> (Division) element is a container used to group HTML elements together.
- It helps organize the structure of a webpage and makes it easier to apply CSS styling.
- A <div> does not have any visual appearance by default
- It is one of the most commonly used elements for creating webpage layouts.

Border

- A border is the line that surrounds an HTML element.
- It separates the element from other elements on the webpage.
- Borders can have different colors, widths, and styles (such as solid, dashed, or dotted).
- They help highlight or define the boundaries of an element.

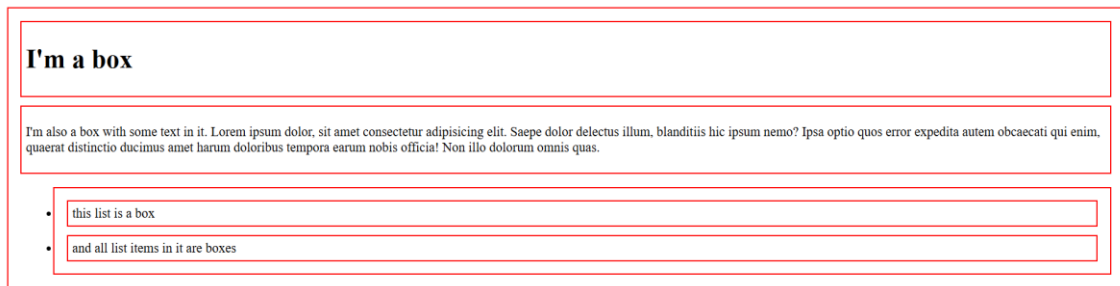

Margin

- Margin is the space outside an element's border.
- It creates distance between one element and another.
- Margins help prevent elements from appearing too close together.
- Increasing the margin moves the element farther away from surrounding elements.

Padding

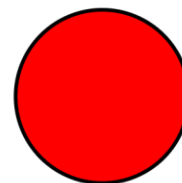

- Padding is the space between the content of an element and its border.
- It creates empty space inside the element.
- Padding improves the appearance and readability of content by preventing it from touching the border.

- Increasing the padding makes the content appear farther from the border while keeping the border in the same position.

```
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Document</title>
  <style>
    *{
      box-sizing: border-box;
    }
    div{
      border: 2px solid red;
      margin: 10px;
      padding: 5px;
    }
  </style>
</head>
<body>
  <h1>TASK 1</h1>
  <div>
    <div>
      <h1>I'm a box</h1>
    </div>
    <div>
      <p>I'm also a box with some text in it. Lorem ipsum dolor, sit amet consectetur adipisicing elit. Saepe dolor delectus illum, blanditiis hic ipsum nemo? Ipsa optio quos error expedita autem obcaecati qui enim, quaerat distinctio ducimus amet harum doloribus tempora earum nobis officia! Non illo dolorum omnis quas.</p>
    </div>
    <ul>
      <div>
        <li>
          <div>this list is a box</div>
        </li>
        <li>
          <div>and all list items in it are boxes</div>
        </li>
      </div>
    </ul>
  </div>
</body>
```

Different Border Radius Properties
